**Subject:** Gold King Mine

Good afternoon Tom,

I wanted to give you an update on where I am with your map request.

Below is a snapshot of a map I have been working on for Area Command I will need to tweak it a little for your use (logos and title). It shows all the sample locations to date along the Animas and San Juan rivers. If you want any changes please let me know.

I am trying to get linear water quality data for both rivers. The Ops Map Viewer had some symbology yesterday, but as of now it's just a solid line from the mine to the CO/NM border. I'm not sure why the data was changed and hope to have an answer sometime today. We have an internal Operations viewer you can access here as well:

Please let me know if I am on the right track.

Thanks!

Eric
